

Great Talent Brings Great Talent – Start Referring Today

Dear SG Analytics Team,

The strongest teams are built through trusted connections and the best talent often comes through the people who already know us best: you.

We are excited to launch our **Employee Referral Campaign – Bring Great Minds On Board**. This initiative is aimed at strengthening our talent community and encourages you to refer skilled professionals from your network who can contribute to SG Analytics' continued growth and success.

At SG Analytics, we believe referrals are more than hiring channels - reflect our culture, trust, and shared commitment to excellence. Referrals are not just about hiring new talent but about building a community of talented, trusted professionals who align with our values and contribute to our long-term success. Your recommendation can help us find exceptional talent while strengthening the teams we build together.

We encourage you to explore the open opportunities and start referring today.

Who are we looking for?

Experienced professionals across key business and support functions who are driven, curious and have a passion for delivering meaningful impact.

How you can participate:

- Refer profiles of suitable candidates for open roles
- Submit referrals via the SG Analytics referral portal
- Encourage strong matches aligned with role requirements and culture fit
- Stay updated on open positions shared through official company communications and the SG Analytics Referral Portal

Why it matters:

Every successful referral strengthens our teams, accelerates hiring, and brings in professionals who already resonate with our culture and ways of working - making integration smoother and impact stronger.

This is your opportunity to directly influence the future of SG Analytics by bringing in people you trust and believe in.

Great people know great people—and that could start with you.

Let's build the future together, one referral at a time.

Regards,

Corporate Communications Team

SG Analytics
