

## **Genpact Signs Strategic Collaboration Agreement with AWS to Accelerate AI Adoption**

Genpact, an agentic and advanced technology solutions company delivering outcomes that shape the future, signed a multi-year Strategic Collaboration Agreement (SCA) with Amazon Web Services (AWS) focused on accelerating the adoption of AI and helping organizations unlock greater value from data and advanced technologies.

By making AI and data capabilities more accessible, Genpact and AWS are enabling decision-makers across functions - from finance and operations to procurement and customer experience - to leverage AI-driven insights, make smarter decisions, and drive innovation at scale.

“Our collaboration with AWS revolves around bringing AI innovations to the forefront of decision-making across every line of business,” said Murat Aksu, Global Leader for Partnerships, Genpact. “This strategic collaboration agreement will break down traditional barriers to AI adoption, making it accessible to business leaders beyond the CIO's office, and help our clients accelerate value through AI-driven insights and solutions.”

The collaboration extends the benefits of AI beyond traditional technology functions, empowering teams across the enterprise to solve challenges faster and drive greater business impact. By combining Genpact’s domain expertise with AWS’s cloud and AI capabilities, organizations can accelerate transformation initiatives and deliver measurable outcomes.

As an AWS Premier Tier Services Partner, Genpact brings deep expertise in AI, data, and analytics. With nearly 1,000 certified AWS professionals, the company helps clients harness AWS services to modernize operations, enhance customer experiences, strengthen risk management, and scale AI-powered solutions across the enterprise.

This strategic collaboration underscores the shared commitment of Genpact and AWS to helping organizations accelerate AI adoption, drive innovation, and unlock greater business value in an increasingly digital world.
